CHUBB®

Bridgepoint Risk Management is key partner of Chubb Personal Risk Services. We value our deep relationship with the leadership team and their experienced network of advisors across the U.S. Each member of their team understands the unique exposures faced by successful individuals and families. We work together to craft comprehensive protection strategies that prioritize your needs.

Bridgepoint Risk Management places a high-priority on exceptional client experiences, their approach to engaging clients, listening first, sharing advice and then creating tailored solutions results in exceeding expectations.

If the unexpected happens, Bridgepoint Risk Management advisors will be your guide and advocate through the claims process. We partner to settle claims quickly and with empathy and compassion. The BridgePoint team makes the claims process exceptional through their attention to the details upfront. With their own dedicated claims team they have the expertise and resources to help clients recover quickly, at the time of loss, with minimal disruption to their lives.

Whether it's working with individuals, families, wealth advisors, family offices, or group umbrella programs, Bridgepoint Risk Management has the team, the carrier relationships and the client focus to offer insight, advice and solutions to truly deliver a first-class insurance experience.
